

Cats & Kittens Spot on

For Cats & Kittens over 12 weeks of age

(contains ethyl butylacetylaminopropionate 4.9% w/w and margosa extract 5.0% w/w)

WHY SHOULD I USE GULLIVERS PETCARE CAT SPOT ON ?

Fleas can cause irritation and make your cat scratch. Fleas can also carry tapeworm and disease. Gullivers Petcare Cat Spot On is the simple and convenient way to repel fleas quickly and effectively, each application lasting up to four weeks.

FLEA CONTROL PROGRAMME

Gullivers Petcare Cat Spot On should be used as part of an effective flea control programme. Fleas will often infest your pet's basket, bedding and regular resting areas, including carpets and soft furnishing. It is recommended that these areas should be treated with a suitable household insecticide flea spray or powder and vacuumed regularly.

HOW SHOULD I USE GULLIVERS PETCARE CAT SPOT?

To open tube – twist off cap (fig.1). Do not squeeze tube during opening. Squeeze tube firmly when applying to ensure entire contents are used. Part your cat's fur between the shoulder blades (fig.2) and apply entire contents of tube directly onto exposed skin (fig.3). Keep the empty blistercard for future reference.

DO NOT MASSAGE THE DROPS INTO THE SKIN. AVOID APPLYING TO FUR

To ensure continuous protection, it is important to re-apply after 28 days. However, if your cat becomes excessively wet, it may be necessary to re-apply earlier. The drops can be re-applied safely after a minimum of seven days. **After use, examine site of application periodically as occasionally a sensitive animal may experience localised irritation, in which case bathe the area with a mild, non-insecticidal shampoo. If symptoms persist or your cat becomes unwell, consult a Veterinary Surgeon, taking this pack and if possible the tube.**

CAUTION: FOR USE ON CATS AND KITTENS OVER 12 WEEKS OF AGE.

For animal use only. Do not use on sick or convalescing cats, nursing queens or kittens under 12 weeks old – from which fleas should be removed using a flea comb. **It is important to ensure that cats do not groom the site of application on another animal that has been treated with this type of product.** Do not use any other flea control products on your cat during the four-week protection period. Do not reapply drops within 7 days of application.

STATUTORY CONDITIONS OF APPROVAL RELATING TO USE: FOR USE ONLY AS AN INSECT REPELLENT. FOR AMATEUR USE AGAINST FLEAS. FOR USE ON CATS AND KITTENS OVER 12 WEEKS OF AGE. TO BE APPLIED DIRECTLY TO THE SKIN (AVOIDING EYES).

Application rate: Apply entire contents of one tube (0.8ml) directly onto the cat's skin. One treatment will last up to 4 weeks. Users must comply in full with all their legal responsibilities under the Control of Pesticides Regulations 1986 (as amended), including complying with all Conditions of Approval. **READ ALL PRECAUTIONS BEFORE USE.** HSE 9507

This product is approved under The Control of Pesticides Regulations 1986 (as amended) for use as directed. To avoid risks to man and the environment, comply with the instructions for use.
